Confucius

4. The song *I Can't Let Maggie Go* by Honeybus was featured on adverts for which product?

Nimble (bread)

5. Which is the most northerly railway station in the UK?

Thurso

Notes

1. The currency is the tugrik, not tugril.

2. The correct title of the song is *Jump Around*.

3. Before 2012 Europe's tallest building was Moscow's City of Capitals, which is almost 45 metres (146 feet) taller than the Commerzbank Tower (which hasn't been Europe's tallest since 2005).

4. The question is missing.

5. It is sometimes necessary to 'fill in the gaps' in a question by making certain assumptions.

Question 10 doesn't specify *which* throne—so has many different, equally-correct answers—but it's reasonable to make the obvious assumption that it refers to the throne of England.

Similarly for Question 74, as it is not stated otherwise, it's not unreasonable to make the 'standard' assumption that the question is about men's sport and the question appears to have been set with the intention of leading teams into making this 'sexist' assumption. This is straying into trick question territory, which is generally regarded as a bad thing. It could even be argued that the given answer is wrong: the name 'England' normally refers to the men's team, whereas the ladies' team is correctly known as 'England Women'.

For sports-related questions, unless information is given to the contrary, certain assumptions **must** be made, e.g. men's sport rather than women's; professional rather than amateur; able-bodied rather than physically-impaired; adults rather than juniors etc. For example, it would take a brave team to answer '[Georgia Hall](#)' or '[Martin Vorster](#)', rather than the more obvious 'Francesco Molinari', when asked for the name of the 2018 Open Golf Champion.

To avoid any possible confusion and/or political incorrectness, **every** sport question should specify 'men' or 'women', where appropriate/necessary. If no such distinction is made, it is taken as read that a question refers to men's 'top-level' sport. **This default assumption is not intended to suggest that women's sport is inferior to/of lesser importance than men's sport** (or, for that matter, that adult sport is 'better' than junior sport, or professional sport is superior to amateur etc).
